

# Specialists in manufacturing mould tools, jigs, fixtures, precision machining and spark eroding

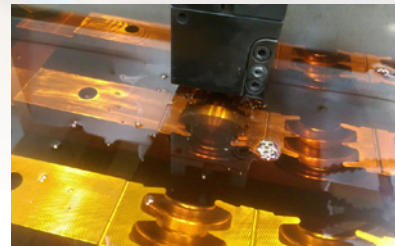

## Experienced tool maker since 1981

R & J Tooling is an experienced tool maker established in 1981. We specialise in producing high quality rubber injection mould tools. With a good capacity in both turning and milling we pride ourselves in producing a variety of intricate and detailed parts. We also have full 3D CAM capacity and a good range of spark erosion machines. If required we will design tooling, or work to your specifications.

## Guaranteed highest standards of quality

The management of R & J Tooling Products Ltd are dedicated to providing the highest possible standards of quality for its products and services and are dedicated to maintaining a quality management system which ensures that its products and services meet requirements agreed with its Clients at all times.

## Quality control

The company defines quality as the conformance of products and services to established and documented requirements derived from Client needs, employee expertise and experience. Systems are open to constant examination and review by all company personnel and approved third parties enabling observations to be made and incorporated, which provide for continuous improvement.
